Performance Returns Summary

The finnCap Slide Rule UCITS Fund returned **-0.47% for the month of February** (GBP Inst Founder Class), slightly **underperforming the benchmark**. In the twelve complete months the fund has been operating it has delivered -5.8%, **outperforming the benchmark by 290bps**. Net return since launch on 12th February 2018 is -6.9%.

Investment Objective & Strategy

The UK smaller companies universe is full of excellent investment opportunities but it is very large (1,500+ stocks) and suffers from limited and inconsistent research coverage. The finnCap solution is an internally-developed investment analysis tool, The Slide Rule, to dramatically simplify the identification of the best companies. Using The Slide Rule, finnCap has developed a stock picking system, called QVGM+, which is used to find the "best" 60-80 stocks. It is these companies into which the fund will invest. The system's core factors are Quality, Value, Growth and Momentum plus a screen for financial quality and stress. The typical company in the resultant portfolio is one with above average growth and above average ROCE (return on capital employed).

Monthly Commentary for February 2019

- **After being 'ravaged by the bear' in Q4 2018, the market has been much happier so far in 2019:** the benchmark is up 5.3% YTD, of which AIM rose 5.9% and FTSE Small Cap rose 4.7%. For wider context, the FTSE250 has risen 10.3% YTD. The market had a proper correction in Q4 2018 (benchmark down 16.5%) and we feel, disaster aside (eg: no deal Brexit followed by a Labour government) the market now has a much more solid foundation from which to build.
- **Fund NAV decreased 0.47% in February, slightly underperforming the benchmark.** Given that growth has been the 'laggard' investment style year-to-date (Value has been the best performer) we are satisfied with this performance given the growth bias of the fund. Year to date, Fund NAV has increased 4.7%.
- In a generally flat market, **37 companies (60% of the portfolio)** delivered positive returns in February.
- **There were some excellent relative performances in the portfolio in February.** Some of the most notable were: Next Fifteen (+21%), LoopUp (+18%), Kainos (+17%), SThree (+16%), dotDigital (+15%) and Bioventix (+15%).
- **There were a few poor performers in the portfolio in February,** but two stand out: **Plus500** (-46%) as the company announced some mistakes in its accounts, and **XLMedia** (-35%) after a strategic update detailing an exit from its Media business.

Key Fund Characteristics

- The current portfolio contains **60** smaller companies that have been picked using our **QVGM+ quantitative process**. These companies are the **best blend of quality and growth** in the UK smaller companies market (£100m - £4bn market capitalisation) after testing for cash flow quality, dividend affordability and financial stress.
- The portfolio aims for broadly an **equal-weight** in each company and the median market capitalisation of portfolio holdings is currently circa £300m.
- **Quality:** the portfolio has a median Free Cash Flow Return on Capital Employed (RoCE) of **28.5%**, c3x the UK smaller companies median of 9.0%.
- **Growth:** the portfolio has a median revenue growth rate of **13%** and operating profit growth rate of **22%**, both growth rates approximately double the UK smaller-co. average.
- **Value:** the portfolio has a median free cash yield of 5.1%, very similar to the smaller companies median of 5.3%, despite a far higher ROCE and growth rate versus the market.
