

FACTSHEET

THE MANAGER

Investment Objective & Strategy

The Crabel Advanced Trend UCITS Fund is advised by Los Angeles based managed futures trading pioneer, Crabel Capital Management, LLC. Crabel Advanced Trend is a systematic trading portfolio designed to efficiently capture long-term trend following returns with the objective of delivering a competitive risk-adjusted return with greater alpha relative to the broader trend following industry. In pursuing this objective, Crabel Advanced Trend will employ multiple, price-driven, systematic strategies that participate in market trends across a diversified global portfolio of managed futures and foreign exchange instruments. The program seeks to control risk by dynamic sizing of new trades relative to market volatility, the use of stops and a balance of volatility broadly diversified across sectors and geographic regions. Crabel Advanced Trend has an approximate 35-45 day average hold timeframe and targets a 15% annualized standard deviation.

Monthly Commentary

The Crabel Advanced Trend UCITS Fund finished August up +2.11%, which brings the year-to-date return to -8.41%. After four consecutive difficult months for the portfolio in Foreign Exchange, August was a very strong month for the sector. In addition to strong returns in Foreign Exchange, the other three sectors were also positive, albeit marginally. In fact, the top ten positive contributors to the portfolio were all foreign exchange instruments, led by the Turkish Lira. Notably, this is not a reflection of elevated risk in the sector. While Foreign Exchange does currently carry slightly more overall VaR-related risk than the other three sectors in the Advanced Trend portfolio, its risk is not high in an absolute sense, but rather a reflection of the other sectors' current below-average risk. Further, while volatility was relatively low overall in August, non-G7 foreign exchange was an exception given the sharp price deterioration of the Turkish Lira, the Russian Ruble and several other non-G7 currencies. Outside Foreign Exchange, the other sectors showed good diversification amongst their constituents. For example, Commodities displayed good returns in metals, while energy trends generally stalled. Similarly, performance in Asian and US fixed income markets was quiet to slightly negative, while European fixed income products showed some good returns. Overall, it was an encouraging month for Advanced Trend as markets outside the most liquid instruments were meaningful contributors -- a continuation of a multi-year trend for the portfolio.

Why Advanced Trend?

- **Thoughtful Design.** Intuitive research into time-frame selection, sector exposure, volatility interpretation and trend quality identification is leveraged to maximize trend capture.
- **Aggressive Trading Cost Reduction.** The cost to execute a trend following strategy adds up far more quickly than is realized. Trade slippage is reduced through Crabel's proprietary algorithmic execution infrastructure.
- **Structurally Diversified.** The program is timeframe and sector diversified trading a broad array of derivative instruments.
