

FACTSHEET

THE MANAGER

Investment Objective & Strategy

The Crabel Gemini UCITS Fund is advised by managed futures trading pioneer, Crabel Capital Management, LLC. Crabel Gemini is a fully systematic portfolio of short holding period strategies designed to target structural market inefficiencies across a broadly diversified set of global futures and currency instruments.

The portfolio is deliberately structured to provide low correlation to all asset classes and offers a unique source of returns with over 40 differentiated and stand-alone strategy frameworks composing the Program. Crabel's focus on execution excellence provides a further advantage in efficiently accessing unique exposures in managed futures and foreign currency markets.

Crabel Gemini seeks to control risk by dynamic sizing of new trades relative to market volatility, the use of stops and a balance of volatility broadly diversified across sectors and geographic regions. Crabel Gemini has an approximate 10-day average hold timeframe and targets a 10% annualized standard deviation.

Monthly Commentary

The Crabel Gemini UCITS Fund finished January down -1.40% after a productive 2018 that saw double digit positive returns for the Fund. At first glance, markets overall continued the relatively volatile environment that produced good opportunities for Gemini in 2018. For example, commencing Friday, January 4th, equity indices kicked off an impressive rally over the course of the month. Other markets exhibited strong trend reversals as well, especially in the commodity sector. In some ways, therefore, January proved a constructive month to illustrate the dynamic nature of Gemini's underlying strategies. From a sector perspective, much of the loss attribution was on the commodity side while the other three sectors were generally flat on the month. From a strategy perspective, Volatility Breakout proved the most challenging strategy category, although Reversal strategies were also slightly negative for the month. Gemini is very deliberately structured toward the goal of being a directionally agnostic but "positive skew" or "positive convexity" portfolio. Against the backdrop of the last decade that rewarded the opposite approach, namely risk premium collection or negative convexity trading, pursuing and capturing returns with a long volatility bias demands skill and the ability to select when markets are likely to exhibit strong volatility breakout inflection points. However, in January, Volatility Breakout markets saw several breakout opportunities on the commodity side that ultimately faded, while in other sectors, for example equity indices, Volatility Breakout strategies generally did not participate aggressively in the large moves that characterized the month. In a "pure alpha" approach this can happen. Overall, continued higher volatility is very welcome for Gemini and suggests there may be significant opportunity ahead.

Why Gemini?

- **Uncorrelated Philosophy.** The portfolio is designed to have low correlation to both traditional asset classes and trend following strategies.
- **Aggressive Trading Cost Reduction.** The cost to execute adds up far more quickly than is realized. Trade slippage is reduced through Crabel's proprietary algorithmic execution infrastructure.
- **Unique Holding Timeframe.** Strategies trade a balanced array of timeframes but average to a 10-day holding period.
- **40 Strategy Concepts in Four Categories.** (i) Volatility Breakout; (ii) Mean Reversion; (iii) Factor Timing; (iv) Opportunistic

Monthly Returns – Crabel Gemini UCITS Fund

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD
2019	-1.40%												-1.40%

The performance figures quoted above represent the performance of the Crabel Gemini UCITS Fund, Institutional USD Share Class, since launch on 2 October 2017. These performance figures refer to the past and past performance is not a reliable guide to future performance.

Crabel is a global alternative investment firm specializing in systematic, automated trading of worldwide futures and foreign exchange. Our Los Angeles based firm was founded by short-term trading pioneer Toby Crabel and has delivered over 25 years of uncorrelated returns for its institutional clients. The firm has developed a diverse array of trading strategies designed to systematically capture market anomalies implemented through a technologically advanced, low latency infrastructure. Global co-location facilities and proprietary execution algorithms allow the firm to efficiently trade in approximately 200 futures and foreign exchange markets.
