

# KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Cooper Creek Partners North America Long Short Equity UCITS Fund a Sub-Fund of MontLake UCITS Platform ICAV, managed by MontLake Management Limited GBP Institutional Founder Class A Pooled Shares (IE00BFXZWF58)

### Objectives and Investment Policy

The investment objective of the Sub-Fund is to achieve long term capital appreciation by investing on a long and/or short basis in the shares of small to mid-capitalisation US companies. The Sub-Fund may also invest in preference shares and convertible bonds, and to some extent, in companies in Canada and the developed markets of Western Europe.

The Sub-Fund will mainly focus on companies which are out of favour or under the radar of financial analysts, so that the market has not yet recognised their inherent value or business potential, and where the Investment Manager believes there is the potential for transformational change and an increase or decrease in value from which the Sub-Fund can benefit.

The Sub-Fund's investment will be made indirectly in its target markets using a series of swaps with Morgan Stanley & Co. International plc or one of its affiliates ("**Morgan Stanley**"). Morgan Stanley will acquire a portfolio of investments meeting the criteria above (the "**Reference Portfolio**") under the direction of the Investment Manager of the Sub-Fund and will pay the return on these investments to the Sub-Fund. This return will form the basis for the performance of the Sub-Fund and the return to its investors.

In exchange for paying the return on the Reference Portfolio to the Sub-Fund, the Sub-Fund will use the capital subscribed to it to acquire a portfolio of assets consisting of shares and convertible bonds, the return on which the Sub-Fund will pay to Morgan Stanley.

The Reference Portfolio will include both long and short positions (i.e. contracting to sell an asset it does not own in expectation of buying the asset later at a lower price and profiting from the fall in value) and may include derivatives such as options or swaps. A derivative is a contract between two or more parties whose value is based on an agreed-upon underlying financial asset or security.

Under normal market conditions, it is expected that long and short positions held through the Reference Portfolio may each represent up to 100% of the net asset value of the Sub-Fund at any one time.

You can sell your shares any day that banks are open in Ireland and the United States. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. one business day before the day on which you want to sell.

Your shares do not pay you income, but instead the Sub-Fund reinvests any income to grow your capital.

As your shares are denominated in Sterling and the Sub-Fund is valued in U.S Dollars, forward contracts are used by the Sub-Fund with the aim of limiting the effects of changes in the currency exchange rates against U.S. Dollars.

The Sub-Fund is actively managed meaning that the investments are made on a fully discretionary basis. The Sub-Fund may measure its performance relative to the Russell 2000 Index and the S&P 500 Index for reference or investor communication purposes. The Sub-Fund does not operate any form of target to outperform a benchmark index.

Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and Reward Profile

The risk category for this Sub-Fund is set at 7. It is calculated in line with EU regulations and is based on the risk limit for the Sub-Fund.

A **category 1** Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. The risk category shown is not guaranteed and may change over time.

When categorising the Sub-Fund it may happen that not all material risks were fully captured in the methodology. For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

**Shorting, Derivatives and Leverage Risk:** The Reference Portfolio, the performance of which will determine the performance of the Sub-Fund, may take short positions and use derivatives. Shorting and the use of derivatives can both involve leverage and the risk of higher volatility, especially if the combination of the Sub-Fund's long and short positions do not work as expected to reduce the overall level of market risk in the Sub-Fund. The Sub-Fund may be exposed to additional risks and costs as a result.

**Credit and Counterparty Risk:** The counterparty to the swaps entered into by the Sub-Fund may fail in paying the return on the Reference Portfolio. If

the counterparty defaults, the Sub-Fund would expect to be able to retain the return generated on the assets it holds to support the Sub-Fund's obligations to the counterparty instead of paying them to the counterparty, but the Sub-Fund's performance would then be determined by the return on these assets, rather than the return on the Reference Portfolio.

**Risk of failure of the Investment Strategy:** The Investment Manager's strategy relies on identifying companies with the potential to undergo transformational change. There is a risk that the expected change may not happen, may take considerably longer than expected or will not trigger a sufficient change in the value of the Sub-Fund's investment to enable the Sub-Fund to achieve its investment objective.

For a more detailed explanation of risks, please refer to the "**Special Considerations and Risk Factors**" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

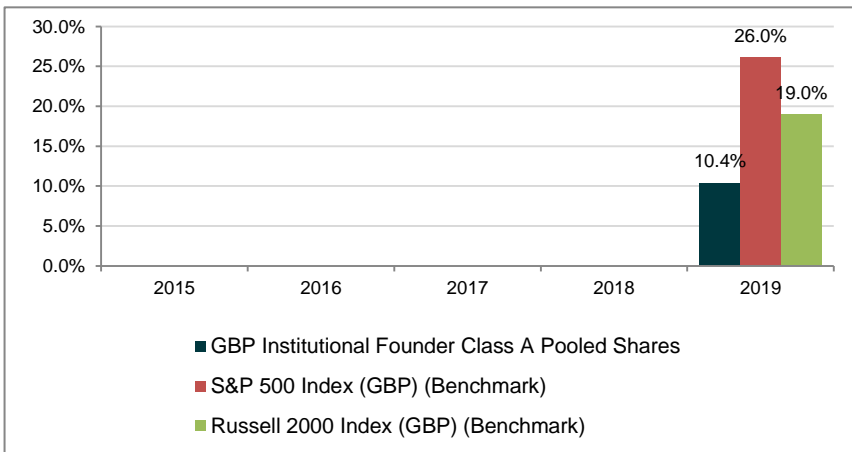

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out	
Charges taken from the Sub-Fund over a year	
Ongoing charge	1.06%
Charges taken from the fund under certain specific conditions	
Performance fee	15.00% of the increase in the NAV per share over the previous highest NAV per share on which performance fee was paid.

Any entry charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the twelve months ending December 2019. This figure may vary from year to year. It excludes portfolio transaction costs and performance fees. In the last financial year ending 31 December 2019, the performance fee amounted to 0.85%.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at [www.montlakeucits.com](http://www.montlakeucits.com).

## Past Performance

The past performance takes account of all charges and costs.

The value of the Share Class is calculated in Sterling.

Past performance is not a reliable indicator of future results.

The Sub-Fund came into existence in 2018. This share class launched on 12 November 2018.

## Practical Information

### About the Sub-Fund

The Sub-Fund's assets are held with its depositary, Northern Trust Fiduciary Services (Ireland) Limited.

Cooper Creek Partners North America Long Short Equity UCITS Fund is a Sub-Fund of MontLake UCITS Platform ICAV.
