Investment Objective & Strategy

The UK smaller companies universe is full of excellent investment opportunities but it is very large (1,500+ stocks) and suffers from limited and inconsistent research coverage. The finnCap solution is an internally-developed investment analysis tool, The Slide Rule, to dramatically simplify the identification of the best companies. Using The Slide Rule, finnCap has developed a stock picking system, called QVGM+, which is used to find the “best” 80-100 stocks. It is these companies into which the fund will invest. The system’s core factors are Quality, Value, Growth and Momentum plus a screen for financial quality and stress. The typical company in the resultant portfolio is one with above average growth and above average ROCE (return on capital employed).

Monthly Commentary

- UK small/mid cap equity markets had a strong rally in April. Our Benchmark* rose 4.3% in the month, largely erasing the losses of Q1. Against this backdrop the Fund managed to more than keep pace with the rally, with NAV +4.5%, equating to 20bps outperformance. The Fund has only been up and running for two full months but has delivered a total return of +3.9% in those two months, equivalent to outperformance of 175bps. An encouraging start.
- In what was already a strong month for equity markets, some of our investments performed exceptionally well: the best was **boohoo** (+23.6%), followed by **Keywords** (+21.8%), **Joules** (+21.2%), **Learning Technologies** (+18.2%), **Idox** (+17.6%), **EKF Diagnostics** (+16.7%), **JD Sports** (+16.6%) plus 10 others rising more than 10% in the month. 60 companies (80% of the portfolio) generated positive returns in April.
- The UK smaller companies market has been littered with landmines in 2018 and unfortunately the Fund trod on one in April, from a most unlikely quarter: **Proactis** warned on some acquisition-integration issues and fell 44%.
- With markets remaining choppy, we remain confident that the Slide Rule Fund contains a strong blend of growth-quality companies that should continue to do better than the market as a whole.
- The initial portfolio contains **75** smaller companies that have been picked using our **QVGM+ quantitative process**. These companies are the **best blend of quality and growth** in the UK smaller companies market (£100m - £4bn market capitalisation) after testing for cash flow quality, dividend affordability and financial stress.
- The portfolio aims for an **equal-weight** in each company. Examples of current holdings include: LoopUp, dotDigital, Softcat, FDM, Proactis, Focusrite, boohoo, Keywords, Joules, Somero and Fevertree.
- **Quality**: the portfolio has a median Return on Capital Employed (RoCE) of **25%**, more than double the UK smaller companies average of 11.5%.
- **Growth**: the portfolio has a median revenue growth rate of **12%** and operating profit growth rate of **25%**, both growth rates approximately double the UK smaller-co. average.
- **Value**: the portfolio has a median EV/EBIT multiple of **14.2x** and median P/E multiple of **18.1x**. This represents a c10% premium to the UK smaller companies average.
