

ABR 75/25 Volatility UCITS Fund

February 2022 | Monthly Report

Fund Description and Objectives

The ABR 75/25 Volatility UCITS Fund (the "Fund") is a sub-fund of MontLake ICAV, an Irish collective asset management vehicle constituted as an umbrella fund with segregated liability between sub-funds with registration number C440876. The Fund seeks to provide long-term capital appreciation by investing in securities and derivative instruments that provide long exposure to CBOE Volatility Index ("VIX Index") futures, S&P 500 Index futures and long-dated U.S. Treasury securities, along with short exposure to VIX Index futures. The Fund is managed by ABR Dynamic Funds (the "Investment Manager"), a New York City-based advisory firm specializing in volatility strategies.

In managing the Fund, the Investment Manager creates a 75/25 blend of its proprietary long volatility and short volatility strategies. Depending on the level of volatility in the market, the Fund will gain exposure to different portfolio constituents in differing amounts or levels in order to generate capital appreciation from price changes involving these instruments.

Investment Manager

Manager Commentary

In February, the S&P 500 lost 2.99% while volatility rose 12.18% (SPVIXSTR Index). The relatively small move in the S&P 500 was the net result of larger swings and several sharp reversals in equities and volatility. Beginning 27 January, the S&P 500 rallied 6.09%, sold off 7.82%, and then rallied 3.54% to close the month. The sharp reversals (i.e., repeated trend changes) were not a favorable environment for the Fund's trend-following model. For the month, the ABR 75/25 Volatility UCITS Fund lost 7.46%.
