

### FACTSHEET

### THE MANAGER

#### Investment Objective & Strategy

The Crabel Advanced Trend UCITS Fund is advised by Los Angeles based managed futures trading pioneer, Crabel Capital Management, LLC. Crabel Advanced Trend is a systematic trading portfolio designed to efficiently capture long-term trend following returns with the objective of delivering a competitive risk-adjusted return with greater alpha relative to the broader trend following industry. In pursuing this objective, Crabel Advanced Trend will employ multiple, price-driven, systematic strategies that participate in market trends across a diversified global portfolio of managed futures and foreign exchange instruments. The program seeks to control risk by dynamic sizing of new trades relative to market volatility, the use of stops and a balance of volatility broadly diversified across sectors and geographic regions. Crabel Advanced Trend has an approximate 35-45 day average hold timeframe and targets a 15% annualized standard deviation.

#### Monthly Commentary

The Crabel Advanced Trend UCITS Fund was down an estimated -7.21% in May which brings the year-to-date estimate to -9.45%. May turned out to be a very difficult month for Advanced Trend as three of four sectors were negative and only Commodities was positive. Overall, there were two general themes that accounted for a disappointing performance month. First, Foreign Exchange was clearly a difficult sector. While Advanced Trend generally does not trade more risk in Foreign Exchange than in other sectors, in 2018 the sector has carried slightly more risk than the other three as a function of market behavior. This proved disadvantageous in May, as general USD strengthening was difficult for the portfolio. The challenging FX moves also happened without a large increase in volatility. Therefore, while the portfolio did systematically reduce exposure slightly, it generally remained positioned against the USD move through the month. Additionally, the Italy scare in the second half of the month, although a relatively small contributor to the loss on the month, did not help. The Italy scare was enough to push the Fixed Income and Equity sectors into the negative attribution category for the month. Despite a frustrating performance number for the month and a down year thus far, with more than half of the year remaining and good diversification in the portfolio across geographies and sectors, the portfolio is well positioned moving forward. Further, while the loss in May was frustrating, particularly given that 2018 in general has already been sub-optimal, losses remain well within expected parameters.

#### Why Advanced Trend?

- **Thoughtful Design.** Intuitive research into time-frame selection, sector exposure, volatility interpretation and trend quality identification is leveraged to maximize trend capture.
- **Aggressive Trading Cost Reduction.** The cost to execute a trend following strategy adds up far more quickly than is realized. Trade slippage is reduced through Crabel's proprietary algorithmic execution infrastructure.
- **Structurally Diversified.** The program is timeframe and sector diversified trading a broad array of derivative instruments.
