

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

AlphaQuest UCITS Fund

a Sub-Fund of MontLake UCITS Platform ICAV managed by Waystone Fund Management (IE) Limited (formerly MontLake Management Limited)

GBP Institutional Class Shares (IE00BD08G408)

Objectives and Investment Policy

Investment Objective

The Sub-Fund's objective is to increase the value of your shares over the long term.

Investment Policy

The Sub-Fund will seek to achieve its objective by taking exposure to the Investment Manager's systematic trading program (the "**Strategy**"), which represents investment in the major equity indices (shares), fixed income securities (interest rates and bonds), currencies and commodities (the "**Sectors**").

The Sub-Fund will mainly invest in futures and forward foreign exchange contracts to gain exposure to the Sectors.

The Sub-Fund will also invest in securities which replicate commodity and fixed income aspects of the Strategy, providing the Sub-Fund with exposure to interest rates, bonds, metals, energy and agricultural commodities. The investment by the Sub-Fund in these securities will not exceed 20% of the Net Asset Value of the Sub-Fund.

The Sub-Fund's use of derivatives, and the fact that it will take both long and short positions will result in the Sub-Fund being leveraged or potentially losing money even when markets are positive. Leverage magnifies the exposure of the Sub-Fund to the underlying investments. In such situations, Sub-Fund returns may rise or fall more than they would have done otherwise, reflecting such additional exposure. It is expected that by using derivatives, the Sub-Fund's long positions may be up to 2,500% of the net assets value of the sub-fund and short positions approximately 2,500% and when netted off against each other, the Sub-

Fund may be anywhere between 2,000% and 2,500% long or short at any given time.

Subscription and Redemption

You must submit your application to the Sub-Fund's Administrator no later than 1.00 p.m. one business day prior to the business day on which you want to sell.

Income

Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

Fund Currency

As your shares are denominated in GBP and the Sub-Fund is valued in USD, forward contracts are used to attempt to eliminate the effects of changes in the currency exchange rates.

Benchmark

The Sub-Fund is actively managed meaning that the investments are made on a fully discretionary basis. The Sub-Fund may measure its performance relative to the S&P 500 Index for reference or investor communication purposes. The Sub-Fund does not operate any form of target to outperform a benchmark index.

Investment Horizon

Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

Why is the Sub-Fund in the specific category?

The risk category for this Sub-Fund is set at 7. It is calculated in line with EU regulations and is based on the risk limit for the Sub-Fund.

Risk Disclaimer

A **category 1** Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. The risk category shown is not guaranteed and may change over time.

When categorising the Sub-Fund, it may happen that not all material risks were fully captured in the methodology:

Credit and Counterparty Risk: The Sub-Fund deposits cash as margin for its derivatives positions with brokers and counterparties and may invest in debt securities or money market instruments. The Sub-Fund is therefore exposed to the risk that a counterparty or credit institution may become unable to meet its financial obligations or declare bankruptcy.

Investment Strategy Risk: The Sub-Fund's success is dependent on the performance of the Strategy. The different markets traded or individual

positions held by the Sub-Fund may be highly correlated to one another at times and may expose the Sub-Fund to significant losses. The Sub-Fund places significant reliance on its relationships with third parties and the loss of these services may adversely affect the Sub-Fund. Trading decisions are based on mathematical analysis of technical factors related to past performance and market activity such as price fluctuations or trading volume variations. The profitability of such a strategy depends on the occurrence in the future of relevant price moves and the ability of the strategy to continue to successfully identify the market trend which the Strategy uses to make profits.

Derivatives and Leverage Risk: The Sub-Fund may use derivatives for taking short positions or for other investment and hedging purposes. Whilst this is intended to help the Sub-Fund to manage risk or to take investment positions more efficiently or effectively than could be done otherwise, derivatives can involve leverage and the risk of higher volatility, especially if some of the expected offsetting positions between long and short investments do not work as expected, and the Sub-Fund may be exposed to additional risks and costs as a result.

Short Selling Risk: The Sub-Fund may create synthetic short positions through the use of derivatives. Short positions behave differently from long positions, and the Sub-Fund can for example come under pressure to close out short positions at short notice, and before an offsetting long position can mature. This can create unexpected losses from positions that might otherwise have been seen as low risk or well hedged.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after the investment	
Entry charge	None
Exit charge	None
This is the maximum that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out.	
Charges debited to the Fund over a year	
Ongoing charge	2.51%
Charges debited to the Fund under certain specific conditions	
Performance fee	The performance fees are calculated in accordance with the methodology described in the prospectus using a rate of 20.00% of any returns the Fund achieves above the previous highest NAV.

Any entry/exit charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charge figure is based on an estimate of the charges. This figure may vary from year to year. It does not include portfolio transaction costs or performance fees.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.montlakeucits.com.

Past Performance

There is insufficient data to produce a useful indication of past performance for the Share Class.

The past performance takes account of all charges and costs.

Past performance is not a reliable indicator of future results.

The Sub-Fund came into existence in 2016.

This share class has yet to launch.

The value of the Share Class will be calculated in GBP.

Practical Information

- The Sub-Fund's assets are held with its depository, Northern Trust Fiduciary Services (Ireland) Limited.
