#### Investment Objective & Strategy

The UK smaller companies universe is full of excellent investment opportunities but it is very large (1,500+ stocks) and suffers from limited and inconsistent research coverage. The finnCap solution is an internally-developed investment analysis tool, The Slide Rule, to dramatically simplify the identification of the best companies. Using The Slide Rule, finnCap has developed a stock picking system, called QVGM+, which is used to find the "best" 80-100 stocks. It is these companies into which the fund will invest. The system's core factors are Quality, Value, Growth and Momentum plus a screen for financial quality and stress. The typical company in the resultant portfolio is one with above average growth and above average ROCE (return on capital employed).

#### Monthly Commentary for September 2018

- We used the 'flat as a pancake' analogy to describe the small/mid cap market in August and the analogy holds for the whole of Q3 and, indeed, 2018 to date. The benchmark was only up 0.3% in Q3, albeit there was a divergence between AIM (+1.5%) and FTSE Small Cap (-0.9%). Within this it is difficult to discern any particular trend. The weakness of Sterling versus the US Dollar in Q3 lent a helping-hand to the small cap US Dollar earners which tend to be the Oil & Gas and Mining companies.
- Fund NAV increased **+0.5% in September, outperforming the benchmark (-0.4%) by 89bps** despite minimal exposure to resources / Dollar earners. Another pleasing performance.
- Despite the benchmark falling in September, there were some good performers in the fund. The best performers in the Fund in September were: **Craneware** (+47.4%), **Learning Technologies** (+42.3%), **boohoo** (+32.3%), **Atalaya** (+19.4%), **Frontier Developments** (+19.2%), **Proactis** (+18.5%), **Taptica** (+14.6%) and **Future Group** (+13.5%).
- **29 companies (45% of the portfolio)** generated positive returns in September reflecting a market that was generally flat/down.
- **There were very few materially poor performers in the Fund in September**. Of note was **IG Group** (-26.2%) and **Bioquell** (-20.0%).

#### Key Fund Characteristics

- The current portfolio contains **65** smaller companies that have been picked using our **QVGM+ quantitative process**. These companies are the **best blend of quality and growth** in the UK smaller companies market (£100m - £4bn market capitalisation) after testing for cash flow quality, dividend affordability and financial stress.
- The portfolio aims for broadly an **equal-weight** in each company and the median market capitalisation of portfolio holdings is currently £300m.
- **Quality**: the portfolio has a median Free Cash Flow Return on Capital Employed (RoCE) of **25%**, about 2.5x the UK smaller companies median of 9.6%.
- **Growth**: the portfolio has a median revenue growth rate of **11%** and operating profit growth rate of **21%**, both growth rates nearly double the UK smaller-co. average.
- **Value**: the portfolio has a median EV/EBIT multiple of **14.0x** and median P/E multiple of **18.7x**. This represents a c10% premium to the UK smaller companies average.
