

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Collidr Adaptive Global Equity UCITS Fund

a Sub-Fund of MontLake UCITS Platform ICAV managed by Waystone Fund Management (IE) Limited  
GBP C Class Shares (IE00BZ1NRX40)

### Objectives and Investment Policy

#### Investment Objective

The Sub-Fund's objective is to deliver returns through a combination of capital growth and income.

#### Investment Policy

To achieve this objective, the Sub-Fund will invest in equities (i.e. shares of companies) and equity-linked securities (e.g. securities which have the potential to convert into a share of a company), focusing on mid to large sized companies from the U.S., Japan, Europe and the U.K. The Sub-Fund may make its investments either directly or indirectly through the use of derivatives and exchange traded funds ("ETFs"), and in doing so, will follow a risk adaptive process whereby its level of market exposure will be adjusted between -100% (i.e. a net short position) and up to 300% net long (i.e. a leveraged or geared exposure).

In general, net shorting means the Sub-Fund should increase in value if market values fall, but decrease if market values increase, while leveraging means the value of the Sub-Fund will increase faster than the market if the market is doing well, but it will fall faster than the market if the market is doing badly.

The Investment Manager will adapt the market exposure to reflect its perception of the prevailing market volatility, with the highest level of volatility likely to result in the lowest amount of market exposure, and conversely the lowest level of volatility will likely lead to the highest level of market exposure.

The Sub-Fund will also adapt its level of currency exposure, and its portfolio may be fully hedged back to the Sub-Fund's base currency, which is Sterling, may be completely unhedged, or somewhere in between, depending on the Investment Manager's perception of the market risk concerned.

Under normal market conditions, 80% of the net asset value of the Sub-Fund may be made up of equities and equity-linked securities, and the balance made up of derivatives, cash, fixed income securities money

market instruments and ETFs, although the Sub-Fund may be entirely invested directly or indirectly through derivatives into equities at any one time.

Derivatives used by the Sub-Fund may include futures (primarily index futures), options, swaps and forward currency contracts. A derivative is a contract the value of which depends on the change in price of an agreed-upon underlying financial asset, index or security and which gives the holder the economic effect of an investment in the underlying asset without actually having to acquire it.

The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund, and is not managed with reference to a benchmark or index.

#### Subscription and Redemption

You may sell your shares on any day that banks are open in Ireland and the United Kingdom. You must submit your application to the Sub-Fund's Administrator no later than 12.00 p.m. on the business day on which you want to sell.

#### Income

Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

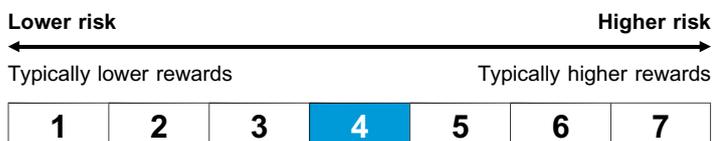

#### Benchmark

The Sub-Fund is actively managed meaning that the investments are made on a fully discretionary basis. The Sub-Fund may measure its performance relative to the MSCI World Equity Local Total Return Index for reference or investor communication purposes. The Sub-Fund does not operate any form of target to outperform a benchmark index.

#### Investment Horizon

Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and Reward Profile

#### Why is the Sub-Fund in the specific category?

The risk category for this Sub-Fund is set at 4. It is calculated in line with EU regulations and is based on a combination of the historic performance of the sub-fund since launch and an index or benchmark representing the performance of the assets in which the sub-fund typically invests for the period before launch.

#### Risk Disclaimer

A **category 1** Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. The risk category shown is not guaranteed and may change over time.

**When categorising the Sub-Fund, it may happen that not all material risks were fully captured in the methodology:**

**Market exposure:** The Investment Manager will adjust the Sub-Fund's market exposure to protect its value in periods of high volatility and to

increase returns in periods of low volatility. If this approach is successful, it will enhance the long term returns from the Sub-Fund. If it is unsuccessful, it may result in lower returns or increased losses compared to other funds with similar investment objectives but which do not seek to take the same risk adaptive approach.

**Derivatives and Leverage Risk:** Leverage arises from entering into derivatives whose terms have the effect of magnifying an outcome meaning the profits and losses from investment can be greater than if the investment is made directly into the underlying securities.

**Short Selling Risk:** The Sub-Fund may create synthetic short positions through the use of derivatives. Short positions behave differently from long positions, and the Sub-Fund can for example come under pressure to close out short positions at short notice, and before an offsetting long position can mature. This can create unexpected losses from positions that might otherwise have been seen as low risk or well hedged.

**Counterparty Risk:** A counterparty may fail in paying proceeds of sale of assets to the Sub-Fund and/or may fail in delivering securities purchased by the Sub-Fund.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

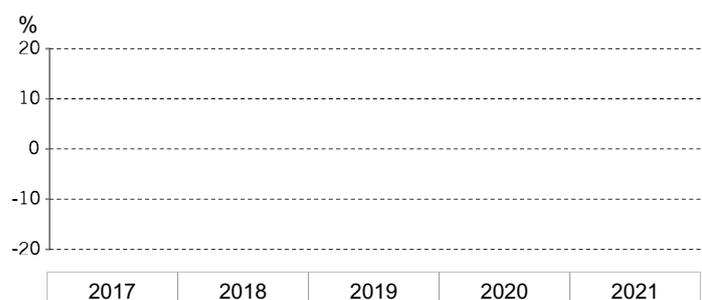

| One-off charges taken before or after the investment  |   |
|---|---|
| Entry charge  | 5.00%   |
| Exit charge   | 3.00%   |
| This is the maximum that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out. |   |
| Charges debited to the Fund over a year   |   |
| Ongoing charge  | 1.77%   |
| Charges debited to the Fund under certain specific conditions   |   |
| Performance fee   | The performance fees are calculated in accordance with the methodology described in the prospectus using a rate of 15% of any returns the Fund achieves above the previous highest NAV. |

Any entry/exit charge shown is a maximum figure. Where charges are shown in some cases you might pay less; you can find this out from your financial advisor or distributor.

The ongoing charge figure is based on an estimate of the charges. This figure may vary from year to year. It does not include portfolio transaction costs or performance fees.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at [www.montlakeucits.com](http://www.montlakeucits.com).

## Past Performance

There is insufficient data to produce a useful indication of past performance for the Share Class.

The past performance takes account of all charges and costs.

Past performance is not a reliable indicator of future results.

The Sub-Fund came into existence in 2016.

This share class has yet to launch.

The value of the Share Class will be calculated in GBP.

## Practical Information

- The Sub-Fund's assets are held with its depository, Northern Trust Fiduciary Services (Ireland) Limited.
